

Picket & Basket Twister Attachment

Model 069

Fits onto the 065 Tube Bender Stand (separate supply) or can be mounted onto the leg of any suitable bench

For bending pickets and baskets from square and flat bar in one operation.

Advantages

- Produces Cages from 6mm square mild steel bar
- Produces Twists from 6mm x 25mm flat mild steel bar or 12.5mm square

Details

- This Picket Twister is Designed to twist 25mm x 5mm flat mild steel bar or 12mm (1/2") square mild steel bar.
- It will produce cages from (6mm) 1/4" square mild steel bar (do not use key steel).
- This Picket Twister is designed as an add on attachment to our Tube Bender/stand combination (064/065) as it bolts directly to the 065 Tube Bender Stand.
- It is possible to use this Picket Twister on its own with a suitable stand to bolt it to (floor to ceiling post or wall not suitable as Picket Twister ideally requires 360° of movement).
- Repositioning handle assembly after half a turn is not ideal as there is a considerable amount of spring back in a picket twisting bend.

Picket bending

Basket bending

Picket & Basket Twister Attachment on optional 065 Tube Bender Stand.
